summary

At the NSA, I had data from real-time events across the planet. Every minute, My team and I depended on the Python and Perl applications I was using and I wanted to know more. I completed the rigorous course at the Turing where I spent my time completing group projects, working as both mentee and mentor in pairing sessions, and bettering my understanding of what it means to be an excellent software developer.

education

University of Massachusetts-Boston

Bachelor's Degree English, 2014
