## ABOUT ME

I am a software developer who has produced results in demanding atmospheres with strict deadlines. I have led teams, but find greater enjoyment working within them. My mentors have made me meticulous in my processes and have empowered me with effective problem solving strategies, constructive communication practices, and poise.

## EDUCATION

**University of Massachusetts-Boston**
Bachelor's Degree- Linguistics, 2014

**Turing School of Software and Design**
Certificate- Front End Engineering, 2019

## EXPERIENCE

**NSA**                                     Data Analyst / Section Chief / Linguist, **2015-2019**
Managed the Microsoft Access database for the foreign military target of our mission. Worked with developers building applications for out mission. Supervised operations for top secret missions.

**Turing School of Software and Design**                     Front End Engineer, **2019-2020**
Completed course focusing on HTML/CSS/JavaScript and later around React, jQuery, Redux, Jest/Enzyme, Node.js, Postgres, TravisCI, Heroku, among other competencies including Ruby and Rails.

**Nanno**                                                     Software Developer, **2020**
Worked within a small, senior team on an application that was being decoupled from a Rails monolith into a progressive web by use of a React frontend and a Rails API. Handled tickets for the front and back ends during the implementation new features. Wrote and tested the API endpoints for these features, as well as built out and tested the front end components. Implemented the testing architecture for the front end with CircleCI and Cypress.
